GUESS I FOUND WHAT?!

I found Baby Emmanuel's GitHub!

GitHub is weird, the way it shows search results just made you feel nothing found.

Why always so late, always after weeks, months later found what he did before.
What will happen if I found this before sending those emails to him? Really want to follow him, but having the concern of being blocked. Still that very cute cat! I love baby Emmanuel! Need to do something after my breakfast today!
